

As the Office Manager at a small market radio station, all I ask is that the FCC not install any regulations that will cause our station, or any other small market radio station for that matter, to record all of our on air programming. As a local radio station, our programming is simply a representation of the community, broadcasting local news, sports, and weather as the local public demands. Please address this issue with the owners of radio stations by talking to them and sharing your concerns on why this has come about.
